

Restart Scouting Checklist

As always, the safety of our Scouts, volunteers, employees and communities is our top priority. This checklist outlines several minimum guiding protocols that adult leaders/volunteers must consider while working with local and state health departments, local councils, chartered organizations and Scouting families on when and how to resume meetings, service projects, camping and all other official Scouting activities.

If it is not practical to meet these minimal protocols, do not restart in-person activities.

S = Supervision

- Understand local and state guidance on preventing COVID-19 exposure.
- Engage your chartered organization and local council on necessary adjustments.
- Conduct the “before you gather” protocols.

A = Assessment

- Identify participants who fall under the CDC’s group of higher-risk individuals. Notify all participants about the risks of participating since COVID-19 exposure cannot be eliminated.
- Verify that the planned activity, gathering or group sizes are not prohibited by local or state orders.

F = Fitness and Skill

- Review Annual Health and Medical Records and consider using a [pre-event screening](#) for all participants.

E = Equipment and Environment

- Verify that handwashing, hygiene and cleaning supplies are available and used properly.
- Monitor social distancing, interactions and sharing of equipment and food among participants.
- Monitor participants for changing health conditions.
- Use the “as you gather” protocols.

SAFE ≠ Risk-Free

As the response to the pandemic shifts to a state-focused, phased approach, the Boy Scouts of America advises local councils to consult with their local and state health departments, as well as local chartered partners, to implement appropriate protocols to help keep our members, volunteers and employees safe.

Precautions and mitigation strategies are important, but they cannot eliminate the potential for exposure to COVID-19 or any other illness when in-person activities resume.

People with COVID-19 may show no signs or symptoms of illness, but they can spread the virus. Some people may be contagious before their symptoms occur. The fact is that someone with COVID-19 may pass the required health screenings and be allowed into program activities.

The Centers for Disease Control and Prevention (CDC) states that older adults and people of any age who have serious underlying medical conditions are at higher risk for severe illness from COVID-19. If you are in this group, please ensure you have approval from your health care provider prior to resuming in-person Scouting activities.

Every member, volunteer and family must evaluate their unique circumstances and make an informed decision before attending in-person activities.

We hope this information will be helpful as you make that choice.

For updates, please monitor <https://www.scouting.org/coronavirus>

Before you gather:

- Consult** your council and chartered organization to understand community standards and protocols in place.
- Communicate** to all parents and youth that the Boy Scouts of America recommends that no one in the higher-risk category take part in person. Continue to engage virtually.
- Communicate** that anyone who feels sick must [stay home](#). If you become sick or develop symptoms, isolate yourself then go home and seek care.
- Educate and train** all participants on appropriate social distancing, [cleaning and disinfecting](#), [hand hygiene](#) and [respiratory \(cough or sneeze\) etiquette](#) before meeting for the first time. Periodically reinforce the behaviors as needed.
- Before attending**, upon arrival and at least daily for longer events, all participants [should be screened](#) for any of the following new or worsening signs or symptoms of possible COVID-19:
 - **Cough**
 - **Shortness of breath or difficulty breathing**
 - **Chills**
 - **Repeated shaking with chills**
 - **Muscle pain**
 - **Headache**
 - **Sore throat**
 - **Loss of taste or smell**
 - **Diarrhea**
 - **Feeling feverish or having a temperature greater than or equal to 100.0 degrees Fahrenheit**
 - **Known close contact with a person who is lab-confirmed to have COVID-19**
- As appropriate**, participants should have [face coverings](#) available to wear when gathering or when in public areas or venues. Several coverings per person may be needed.
- Communicate** that those who take part in person should avoid contact with higher-risk individuals for 14 days after the event.

As you gather:

- Minimize group sizes.** Small groups of participants who stay together all day every day, remain [6 feet apart](#) and do not share objects are at the lowest risk. Think of a den or patrol that does not mix or gather with other dens or patrols, with supervision that stays with the small group. *Scouting's [Barriers to Abuse](#) always apply.*
- Stay local** to your geographic area and groups for unit activities. If you must travel, limit mixing with others along the way.
- Minimize mixing** with parents or siblings unless they are part of the unit activity. For example, the same parent picks up and drops off youth, and stays in the car. No guests or visitors who have not been through the pre-gathering protocols and screening should take part.
- Have hand sanitizer**, disinfecting wipes, soap and water, or similar disinfectant readily available for use at meetings, activities and campouts.
- Minimize the use** of common areas and shared tools. If unavoidable, they should be thoroughly cleaned and disinfected between uses.
- Develop dining protocols** (including but not limited to):
 - No self-serve buffet meals or common water coolers.
 - Use of disposable utensils, napkins, cups and plates.
 - Clean and disinfect eating and cooking gear after each use.
- Develop tenting protocols** for the group:
 - Minimize use of fans or devices that stir the air.
 - Campers should sleep head-to-toe in bunks or cots spaced as far apart as possible.
 - Individual tents, hammocks and bivys may be considered.
- During program activities:**
 - Equipment that must be shared should be disinfected before and after each use.
 - Where possible, assign activity-related protective equipment for the duration of an event to a single individual (life jacket, gloves, harness).
 - Effective handwashing before and after each program area use.
- In case of an injury or illness**, promptly report the incident, including COVID-19 exposures. Utilize [Incident Reporting Resources](#), including COVID-19 instructions.

When you get home:

- Avoid contact** with higher-risk individuals for 14 days.
 - Monitor** for any signs of illness for 14 days, and
- Communicate** with your unit leadership should you develop symptoms.

BSA SAFETY MOMENT

PRE-EVENT MEDICAL SCREENING

SUMMARY

Preparing for a campout or other event takes a lot of planning. One way to make sure everyone has fun and stays healthy while participating is to use the Pre-Event Medical Screening Checklist before getting in those vehicles. Helping to prevent the spread of communicable diseases should be included as part of your preparation.

GENERAL INFORMATION

Why should you add one more thing to your to-do list? Checking to make sure everyone is well enough to attend before heading to the event makes sense. The Pre-Event Medical Screening Checklist can help you do just that very quickly and easily. It is a tool to find out if someone is ill before you hit the road. Use it for everyone attending the event—adults and youth alike.

Before leaving, you should do a quick health check for every participant. This includes:

- Reviewing each participant's Annual Health and Medical Record (AHMR) with them. Make sure all sections are completed and identify any potential medical issues.
- Checking to make sure participants have enough medication for the entire length of the trip including all emergency medications, such as asthma rescue inhalers and EpiPens, if needed.
- Determining if everyone is healthy enough to travel and attend the event. Use the Pre-Event Medical Screening Checklist as a fast way to do a medical check. Eight quick questions can help to stop the spread of common communicable diseases to others in attendance. If someone responds "yes" to a question, the checklist provides guidance on what to do.

If you are traveling long distances, it may be a good idea to use the checklist upon arrival at the event too. Symptoms can pop up on the way, and by identifying an illness early you can potentially help prevent transmission to others in your group as well as to the others in attendance.

The Pre-Event Medical Screening Checklist is not meant to be printed and saved. Do not keep it as a part of the AHMR. In fact, you can use just one copy or an electronic version during your health check before leaving. No need to fill it out. Just ask each person the questions. That's all there is to it!

Model Pre-Event Medical Screening Checklist

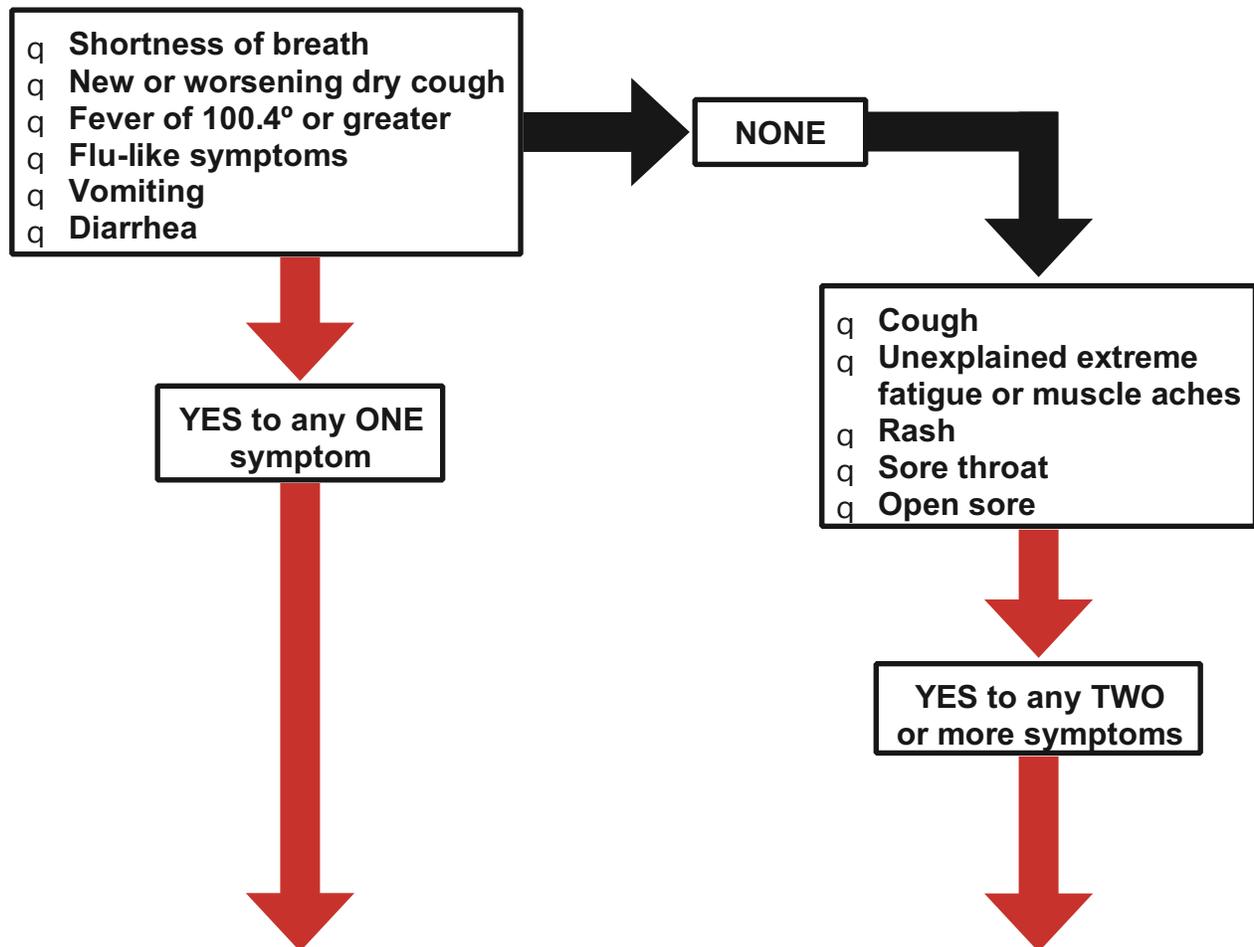

Please Answer the following;

- Yes No Have you been in contact with anyone who has COVID-19 or is otherwise sick?
 Yes No Have you or anyone you have been in close contact with traveled on a cruise ship, internationally, or to an area with a known communicable disease outbreak in the last 14 days?

If the answer is "yes" to either of these questions, the participant must stay home.

- Yes No Are you in a higher-risk category as defined by the CDC guidelines?
If the answer is "yes" to this question, we recommend that you stay home. Should you choose to participate, you must have approval from your healthcare provider and then proceed to the symptom decision tree below.

If the above answers are "no," proceed to this symptom decision tree.

THE PARTICIPANT MUST STAY HOME
These symptoms are associated with communicable diseases and the participant **MUST** stay home until medically cleared by their health care provider.

Signing below I am stating the above answers are true and correct 24 hours prior to arrival to camp.

Printed Name: _____ Troop #: _____ Council: _____
